

TO: Dealer Sales & Service Team
SUBJECT: IQS Quick Tip #17 - Power Liftgate with Auto Close
DATE: January 2023

Models: Some 23 Model Year Telluride, EV6, and Carnival Vehicles

Take the time to explain the operation of the **Smart Power Liftgate with Liftgate Auto Close** to applicable Telluride, EV6, and Carnival customers during the vehicle orientation process.

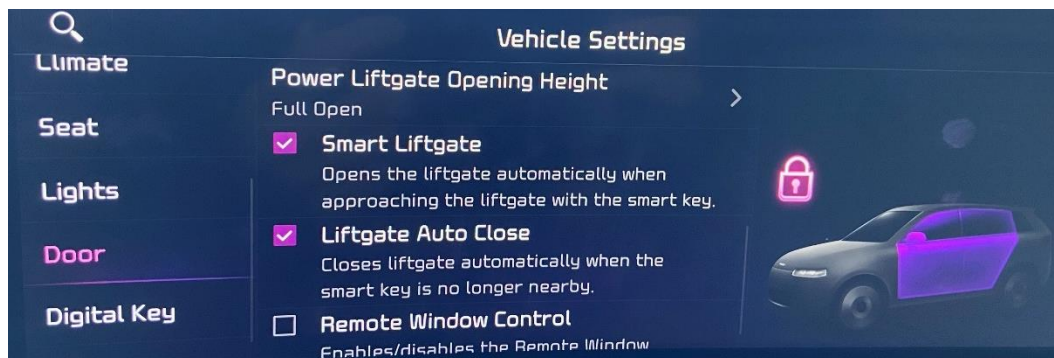

This feature allows hands free operation of the liftgate.

System Operation:

Opening:

If the Smart Power Liftgate and Liftgate Auto Close features are selected, the liftgate will open automatically when the vehicle detects the smart key approaching the liftgate. The hazard lights will blink and a chime will sound for about 3 seconds to alert the user that the smart key has been detected and the liftgate is about to open.

- Setup -> Vehicle -> Door-> Smart Liftgate & Liftgate Auto Close

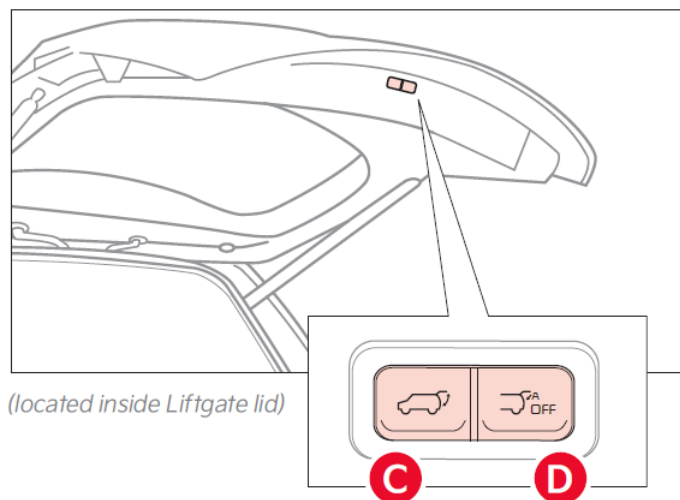

Closing:

Walking away with the smart key will initiate the liftgate to Auto Close. To temporarily disable the Auto Liftgate Close, press the button on the liftgate as shown by the letter D on the diagram to the right.

Notes:

When Auto Close is selected and the liftgate is open, there is an audible intermittent chime.

Stop the liftgate from opening or closing by pressing any button on the smart key.
